Minimum subscription: USD 7,500	Subscriptions / redemptions: daily	Price per share C GBP hedged: GBP 1.5187
Inception date: 11 March 2009	Initial fee: none	Currency: USD
Benchmark: 60% MSCI AC World, 40% ICE BofAML Global Broad Market		

Investment objective

The portfolio aims to provide a balance between capital preservation and capital growth in the base currency with a reduced level of volatility, via strategic exposures to a wide range of asset classes. The Fund is ideally suited to investors with a moderate risk tolerance and an investment horizon of 3 years or longer. The investment objective is achieved through a diversified portfolio that invests, primarily via other collective investment schemes, across a broad range of asset classes and currencies in varying proportions over time. These asset classes include international equities, fixed income, commodities, alternative strategies, property, money market instruments and asset allocation portfolios.

Fund performance - share class A

Past performance is not indicative of future returns. Fund performance is calculated on a total return basis, net of all fees and in US dollar terms.

■ Portfolio commentary

Following the sharp setback in equity markets during October, we increased the allocation to developed market equities in the Portfolio by approximately 2% shortly after month end. The market environment has clearly become more challenging this year, but valuations in equities have improved significantly due to the strong growth in corporate earnings and market falls. We came into this period with a relatively cautious stance and so were able to take advantage of the buying opportunity presented to us whilst still maintaining a resilient and well-diversified Portfolio composition.

Also, in early October we initiated a small position in the Sequoia Economic Infrastructure Income Fund Ltd. This is a closed-ended fund listed on the London Stock Exchange. By virtue of its size (market cap of over GBP 1 billion) and good liquidity, it is a constituent of the FTSE 250 index. The Fund is managed by a highly experienced, well-resourced and dedicated management team in London. The strategy focus on taking debt exposures to operational economic infrastructure projects across mature developed market jurisdictions around the world, with a strong bias towards North America. The Fund yields close to 6% p.a. with much of this generated from floating rate loans, which are less vulnerable to interest rate increases than fixed rate bonds, and it is diversified across 59 underlying investments as well as across a wide variety of infrastructure categories. Accordingly this holding brings a high diversification benefit to the fixed income portion of this Portfolio. We took this new position during an equity placing completed by the manager at a discount to the prevailing market price. For now it is a relatively small position of less than 1% of the Portfolio but we intend to increase the position size over time.

■ Risk warnings and important notes

Investment in the Fund may not be suitable for all investors and financial advice should be sought before proceeding with an investment. Past performance is not indicative of future returns and there can be no assurance that the performance of the Fund will achieve its stated objective. All performance is calculated on a total returns basis, net of all fees and commissions and in US dollar terms.

Collective investments are generally medium to long term investments and are traded at ruling prices. The value of the Fund and any income arising from it are not guaranteed and may fall, as well as rise, due to the value of its holdings, the income derived from them, and changes in interest rates. The Fund will hold shares or units in underlying funds which invest internationally, which will be exposed to exchange rate fluctuations, and may erode any potential gains.

Higher risk investments, such as small companies (even in developed markets), emerging markets, single country debt, equity funds, high yield and sub-investment grade debt may be more prone to sudden and larger falls in value in comparison to other investments. Unregulated funds may permit a greater degree of leverage than is permitted with regulated funds that are available to the general public in South Africa, which increases volatility and the risk of larger losses should the fund's value decrease.

The Fund may contain shares or units in underlying funds that do not permit dealing every day. It is not possible to immediately assess the proper market price of these investments, as they will only be realisable on their dealing days.

A fund of fund collective investment scheme only invests in other collective investments, which levy their own charges. The fees charged within the Fund and by the managers of the underlying funds are not guaranteed and are subject to change thereby impacting the Fund's performance. Commissions and incentives may be paid and, if so, would be included in the overall costs. Deductions of charges and expenses mean that you may not get back the amount you invested.

Momentum Global Investment Management Limited is the Investment Manager, authorised and regulated by the UK Financial Conduct Authority, with its registered address at The Rex Building, 62 Queen Street, London EC4R 1EB. Momentum Global Investment Management Limited is also an authorised Financial Services Provider pursuant to the Financial Advisory and Intermediary Services Act No. 37 of 2002 in South Africa.
