

Investment Objective

The Fund is a multi-asset, globally diversified portfolio investing in equities, bonds, property, and money market instruments without restriction. It does not impose target bands across any of these classes and may deviate materially from its benchmark (50% equities, 30% bonds, and 20% money market). We seek to achieve our investment objective of long-term capital growth with an acceptable level of risk through an actively-managed portfolio of assets, spread over a broad range of asset classes, currencies, and geographies in varying proportions over time. The fund should be viewed as a medium to long term investment.

Investment Commentary

World markets overcame mid-month volatility to close just over 1% higher despite heightened concerns about slowing global growth, and the continuing decline in the global earnings revision ratio (now at its lowest level since 2015). Adding to the gloom was a steep fall in US long term rates and a consequent yield curve inversion – historically a reliable predictor of recession.

Nevertheless markets pushed higher – driven purely by multiple expansion, given that fundamentals were deteriorating. Factors buoying investor sentiment included the Fed's U-turn into a dovish mode, which allowed other central banks to ease back as well. Falling inflation expectations suggested that the steep decline in interest rates could be sustained.

As important was apparent progress in the US/China trade talks which enabled President Trump to postpone the planned March tariffs.

Finally, there were several 'green shoots' highlighted by economists suggesting that the decline in global economic growth is nearing a trough.

Fortunately, valuations in developed markets were mostly in line with long term averages and were thus not an inhibiting factor to the recovery.

Current Portfolio - Manager Comments

We rotated out of certain of our more defensive shares into Asian and emerging market ETF's and slightly reduced our overall exposure to equities in the process (from 73% to 65%).

Going forward, we plan to steadily de-emphasize our ETF exposure (currently almost half our equity exposure) in favour of direct equities. Effectively this will provide greater focus, but a cap on individual exposure of around 6% will ensure that our diversification strategy will be maintained.

As required by legislation we confirm that the fund has adhered to its policy objective and strategy.

Over USD60M	0.25%			

Performance fees are not applicable for this fund

TER

The Flagship International Flexible Fund Class A USD has a Total Expense Ratio (TER) of 1.98%. Financial year-end TER 1.99%. The Total Expense Ratios (TERs) are the percentages of the net asset value of the class of the Financial Product incurred as expenses relating to the administration of the Financial Product. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. A current TER may not necessarily be an accurate indication of future TERs. The TER to 29 March 2019 is based on data for the period from 29 June 2018 to 29 March 2019 and the financial year-end TER is based on data for the financial year-end to 30 June 2018. Cost ratios are calculated using historical actual and/or estimated data and are provided solely as an indication/guide as to the annual expenses/costs that could be incurred. These ratios do not represent any current/actual charges or fees.

Up to date Fund prices per share are available on www.morningstar.co.za or upon request from the Manager or Administrator.

Risk Considerations and Important Information

- Collective investments are generally medium to long term investments. The value of units may go down as well as up, and past performance is not necessarily a guide to the future. Investment in the Fund entails risks which are detailed in The Supplement.
- Fund share prices per class are calculated on a net asset value basis, which is the total value of all assets in the portfolio attributable to a share class including any income accruals and less any permissible deductions (such as brokerage, taxation, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio, divided by the number of Fund shares of the class in issue.
- Portfolio performance is calculated on a NAV to NAV basis. No dividends will be paid. All income received will be reinvested.
- Collective investments are traded at ruling prices. Commission and incentives may be paid and, if so, would be included in the overall costs. All performance is calculated Total Return, Net of all fees and commissions and in US dollar terms. Forward pricing is used.
- Annualised returns are period returns re-scaled to a period of 1 year. This allows investors to compare returns of different assets that they have owned for different lengths of time. Actual annual figures are available to investors upon request. Investment performance calculations are available for verification upon request. The performance is calculated for the Fund. The individual investor performance may differ, as a result of various factors, including the actual investment date.
- The Fund may invest in other collective investments, which levy their own charges. This could result in a higher fee structure for the Fund.
- Fluctuations in the value of the underlying assets and the income from them and changes in interest rates mean that the value of the Fund and any income arising from it may fall, as well as rise, and is not guaranteed.
- Deductions of charges and expenses mean that you may not get back the amount you invested.
- The fees charged within the Fund and by the managers of the underlying funds are not guaranteed and may change in the future.
- Notwithstanding ongoing monitoring of the underlying assets within the Fund, there can be no assurance that the performance of the Fund will achieve its stated objectives.
- The Fund may contain shares or units in underlying funds that do not permit dealing every day. Investments in such funds will only be realisable on their dealing days. It is not possible to assess the proper market price of these investments other than on the fund's dealing days.
- No borrowing will be undertaken by the Fund save for the purpose of short term liquidity requirements. Borrowings will not exceed 10% of the NAV of the Fund. For such purpose the securities of the Fund may be pledged. No scrip borrowing will be allowed.
- The Manager has the right to close the Fund to new investors, in order to manage it more efficiently, in accordance with its mandate.
- Investment in the Fund may not be suitable for all investors. Investors should obtain advice from their financial adviser before proceeding with an investment.
- Investors are reminded that any forecasts and/or commentary included in this MDD are not guaranteed to occur, and merely reflect the interpretation of the public information and propriety research available to the Investment Manager at a particular point in time.
- This Report should be read in conjunction with the Prospectus of Momentum Mutual Fund ICC Limited and the Fund Supplement, in which all fees and fund facts are disclosed.
- Copies of these Scheme Particulars, including the Prospectus, Fund Supplement, and the annual accounts of the Scheme, which provide additional information, are available, free of charge, upon request from Momentum Wealth International Limited, La Plaiderie House, La Plaiderie, St Peter Port, Guernsey, GY1 1WF, Telephone 0044 1481 735480, or from our website www.momentum.co.gg.
- This Report should not be construed as an investment advertisement, or investment advice or guidance or a proposal or recommendation in any form whatsoever, whether relating to the Fund or its underlying investments. It is for information purposes only and has been prepared and is made available for the benefit of the investors in the Fund.
- Whilst all care has been taken by the Investment Manager in the preparation of the information contained in this Report, neither the Manager nor Investment Manager make any representations or give any warranties as to the correctness, accuracy or completeness of the information, nor does either the Manager or Investment Manager assume liability or responsibility for any losses arising from errors or omissions in the information.
- Momentum Mutual Fund ICC Limited is an incorporated cell company governed by the provisions of the Companies (Guernsey) Law 2008 as amended. Prior to its incorporation as an incorporated cell company on 19 January 2007, it was registered as a protected cell company on 20 February 2006. It is authorised as an open-ended Collective Investment Scheme of Class B-by the Guernsey Financial Services Commission under the Protection of Investors (Bailiwick of Guernsey) Law, 1987, as amended. In giving this authorisation the Guernsey Financial Services Commission do not vouch for the financial soundness of Momentum Mutual Fund ICC Limited or for the correctness of any of the statements made or opinions expressed with regard to it.
- Flagship International Flexible Fund IC Limited is a registered incorporated cell of Momentum Mutual Fund ICC Limited, with registered number 48255.

- Momentum Wealth International Limited retains full legal responsibility for the Fund.
- Momentum Wealth International Limited does not provide any guarantee, either with respect to the capital or the return of the Fund.
- This Report may not be circulated or copied where it may constitute an infringement of any local laws or regulations. This Report is for the sole use of the intended recipient and may not be reproduced or circulated without the prior written approval of the Manager.

Risks

- Higher risk investments may be subject to sudden and large falls in value in comparison to other investments. Higher risk investments include, but are not limited to, investments in smaller companies, even in developed markets, investments in emerging markets or single country debt or equity funds and investments in high yield or non-investment grade debt.
- The Fund will contain shares or units in underlying funds that invest internationally. The value of your investment and the income arising from it will therefore be subject to exchange rate fluctuations.
- Foreign securities may have additional material risks, depending on the specific risks affecting that country, such as: potential constraints on liquidity and the repatriation of funds; macroeconomic risks; political risks; foreign exchange risks; tax risks; settlement risks; and potential limitations on the availability of market information.
