

Fintax International Growth Fund

Month ended 28 August 2019

Investment objective

The investment objective of the Fund is to achieve capital appreciation over capital preservation. The portfolio will retain a good level of diversification and will invest directly, or indirectly, into a wide range of asset classes that include cash, bonds, equities, alternative strategies, commodities and property. The investment of the Fund is not constrained to an asset allocation benchmark and will be actively managed to reduce risk.

Cumulative returns¹

Fintax International Growth Fund

■ Risk warnings and important notes

Investment in the Fund may not be suitable for all investors and financial advice should be sought before proceeding with an investment. Past performance is not indicative of future returns and there can be no assurance that the performance of the Fund will achieve its stated objective. All performance is calculated on a total returns basis, net of all fees and commissions and in US dollar terms.

Collective investments are generally medium to long term investments and are traded at ruling prices. The value of the Fund and any income arising from it are not guaranteed and may fall, as well as rise, due to the value of its holdings, the income derived from them, and changes in interest rates. The Fund will hold shares or units in underlying funds which invest internationally, which will be exposed to exchange rate fluctuations, and may erode any potential gains.

Higher risk investments, such as small companies (even in developed markets), emerging markets, single country debt, equity funds, high yield and sub-investment grade debt may be more prone to sudden and larger falls in value in comparison to other investments. Unregulated funds may permit a greater degree of leverage than is permitted with regulated funds that are available to the general public in South Africa, which increases volatility and the risk of larger losses should the fund's value decrease.

The Fund may contain shares or units in underlying funds that do not permit dealing every day. It is not possible to immediately assess the proper market price of these investments, as they will only be realisable on their dealing days.

A fund of fund collective investment scheme only invests in other collective investments, which levy their own charges. The fees charged within the Fund and by the managers of the underlying funds are not guaranteed and are subject to change thereby impacting the Fund's performance. Commissions and incentives may be paid and, if so, would be included in the overall costs. Deductions of charges and expenses mean that you may not get back the amount you invested.

Momentum Global Investment Management Limited is the Investment Manager, authorised and regulated by the UK Financial Conduct Authority, with its registered address at The Rex Building, 62 Queen Street, London EC4R 1EB. Momentum Global Investment Management Limited is also an authorised Financial Services Provider pursuant to the Financial Advisory and Intermediary Services Act No. 37 of 2002 in South Africa.

Momentum Mutual Fund ICC Limited is an incorporated cell company governed by the provisions of the Companies (Guernsey) Law 2008 as amended.
