Investment objective

The investment objective of the fund is capital appreciation in real terms. The fund is ideally suited to investors with an investment horizon of 5 years or longer, and a moderate risk tolerance (measured in the Base Currency of the fund) over this period. The investment manager will tolerate short-term volatility in order to achieve the investment goal of long term real returns. The Fund intends to achieve its investment objective through a diversified global portfolio primarily consisting of investments in participatory interests of portfolios of collective investment schemes or other similar schemes.

Fund performance

Cumulative returns

| | Highest performance | Lowest performance | Cumulative performance |
|-----------------|---------------------|--------------------|------------------------|
| 2013 | +4.1% (Jul 2013) | -4.2% (Jun 2013) | +10.7% |
| 2014 | +3.4% (Feb 2014) | -3.1% (Sep 2014) | -0.7% |
| 2015 | +6.0% (Oct 2015) | -4.2% (Aug 2015) | -3.7% |
| 2016 | +5.9% (Mar 2016) | -5.3% (Jan 2016) | +7.5% |
| 2017 | +2.1% (Dec 2017) | 0.0% (Aug 2017) | +13.5% |
| Since inception | +6.0% (Oct 2015) | -6.5% (Oct 2018) | +15.0% |

^ With effect from 01.07.18 the 30% allocation in the FTSE WorldBIG index was replaced with the ICE BofAML Global Broad Market index. Both indices have had similar returns since the inception of the Fund and this change, which has not been applied retrospectively, has no significant impact on the performance comparison. The Fund performance is calculated on a total return basis, net of all fees and in US dollar terms. NAV to NAV figures have been used for the performance calculations. The performance is calculated for the Fund. The individual investor performance may differ, as a result of various factors, including the actual investment date. Investment performance calculations are available for verification upon request. Annualised returns are period returns re-scaled to a period of 1 year. This allows investors to compare returns of different assets that they have owned for different lengths of time. Actual annual figures are available to investors upon request. US CPI +2% performance has been shown as an indication of how the fund's returns compare to its objective of delivering capital appreciation in real terms. Peer group median: Morningstar EAA USD Flexible Allocation, filtered for (1) oldest share class, (2) funds registered in South Africa (3) funds not domiciled in South Africa.

† Please refer to the fund supplement and scheme particulars for a detailed description of fees and fund facts.

* The Total Expense Ratios (TERs) are the percentages of the net asset value of the class of the Financial Product incurred as expenses relating to the administration of the Financial Product. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. A current TER may not necessarily be an accurate indication of future TERs. The TER to 28 September 2018 is based on data for the period from 29 September 2017 to 28 September 2018 and the financial year-end TER is based on data for the financial year-end to 29 June 2018. Cost ratios are calculated using historical actual and/or estimated data and are provided solely as an indication/guide as to the annual expenses/costs that could be incurred. These ratios do not represent any current/actual charges or fees.

** Current asset allocation figures look through to the holdings of underlying collective investment schemes.
